

**Abstract**

**Improvements in or relating to the Devices**

5 A bottle for dispensing two liquids, the bottle  
comprising two reservoirs, one for each liquid, a  
nozzle through which the liquids are dispensed from  
the bottle, a passageway from each reservoir leading  
out of the nozzle, and a deflector plate between the  
10 two passageways and projecting from the end of a  
nozzle in a direction substantially parallel to the  
direction of flow from the nozzles thereby causing the  
liquid leaving one passageway to be deflected towards  
the liquid leaving the other passageway so that the  
15 two liquids first mix once they have passed the  
deflector plate.
